Develop low-fidelity paper prototypes for a banking app and convert them into digital wireframes using Pencil Project

AIM:

The aim is to develop low-fidelity paper prototypes for a banking app and convert them into digital wireframes with Pencil Project.

PROCEDURE:

Tool Link: <https://pencil.evolus.vn/>

Step 1: Create Low-Fidelity Paper Prototypes

1. Define the Purpose and Features:

- Identify the core features of the banking app (e.g., login, account balance, transfers, bill payments).

2. Sketch Basic Layouts:

- Use plain paper and pencils to sketch basic screens.
- Focus on primary elements like buttons, menus, and forms.

3. Iterate and Refine:

- Get feedback from users or stakeholders.
- Iterate on your sketches to improve clarity and functionality.

Step 2: Convert Paper Prototypes to Digital Wireframes Using Pencil Project

1. Install Pencil Project:

- Download and install Pencil Project from the official website.

2. Create a New Document:

- Open Pencil Project and create a new document.

3. Add Screens:

- Click on the “Add Page” button to create different screens (e.g., Login, Dashboard, Transfer).

4. Use Stencils and Shapes:

- Use the built-in stencils and shapes to create UI elements.
- Drag and drop elements like buttons, text fields, and icons onto your canvas.

5. Organize and Align:

- Arrange and align the elements to match your paper prototype.
- Ensure that the design is user-friendly and intuitive.

6. Link Screens:

- Use connectors to link different screens together.
- Create navigation flows to show how users will interact with the app.

7. Add Annotations:

- Include annotations to explain the functionality of different elements.

8. Export Your Wireframes:

- Once satisfied with your digital wireframes, export them in your preferred format (e.g., PNG, PDF).

OUTPUT:

Login Page Dashboard Page

The image displays three wireframe screens for a banking application, each with a blue header bar labeled "IND BANK".

- Login Page:** Features a light gray background with a teal rectangular input field for "NAME", another teal rectangular input field for "ACC NO.", and a blue oval button labeled "LOGIN".
- Dashboard Page:** Features a light gray background with a blue header bar. Below the header, it says "WELCOME!!!". Underneath, it says "ACC BALANCE:" followed by a white rectangular box containing the number "7492455". At the bottom, there are two cyan rectangular buttons labeled "TRANSFER" and "PAY BILLS".
- Transfer Money Page:** Features a light gray background with a blue header bar. Below the header, it says "Account Balance: Rs. 4,50,000". Underneath, there are four text input fields labeled "To Account:", "IFSC code:", "Amount:", and "Note:". At the bottom, there is a cyan rectangular button labeled "Send Money".

Transfer Money Page

RESULT:

A low-fidelity paper prototype for a banking app has been formed and convert into digital wireframes using Pencil Project.
